

Embedding Storyboard That

When you are done editing your Storyboard That project, click Save & Edit.

You will be able to continue where you left off, or grab the embed code to put your project in your Wiki page.

Find the < > Embed button and click on it.

Copy the Embed code.

```
Copy This Code Snippet
<a href="https://www.storyboardthat.com/userboards/rhondaluetje/trial-storyboard"></a>
<br>
<a href="https://www.storyboardthat.com/userboards/rhondaluetje/trial-storyboard/copy">Create a Copy</a> |
<a href="https://www.storyboardthat.com/userboards/rhondaluetje/trial-storyboard">View Larger</a>
```

In your Wiki page, you will be using the Widget component (Other HTML) to add your Storyboard That.

You will tweak the code a little for it to work well in your Wiki. ADD the text that is in green, DELETE the text that is red.
